Minimum Control Measure 6. Stormwater Management for Municipal Operations

The information in this section is being reported (check one):

How many MS4s contributed to this report?

- 1. Choose/list each municipal operation/facility that contributes or may potentially contribute Pollutants of Concern to the MS4 system. For each operation/facility indicate whether the operation/facility has been addressed in the MS4's/Coalition's Stormwater Management Program(SWMP) Plan and whether a self-assessment has been performed during the reporting period. A self-assessment is performed to: 1) determine the sources of pollutants potentially generated by the permittee's operations and facilities; 2) evaluate the effectiveness of existing programs and 3) identify the municipal operations and facilities that will be addressed by the pollution prevention and good housekeeping program, if it's not done already.**

7. Evaluating Progress Toward Measurable Goals MCM 6

Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

The Village will continue monitoring municipal operations for stormwater pollution prevention opportunities. The Village will continue annual inspections, removal of materials from structures, use of natural alternatives to control bee populations, and prohibit the use of fertilizers and pesticides on public property. As a long term goal, the Village will evaluate the feasibility of constructing a new building for the storage and washing of maintenance vehicles and equipment.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

Approximately 37 cubic yards of material were removed from catch basins. The street sweeper traveled approximately 700 street miles and 4 acres of parking lots during the reporting period. With the exception of the application of natural alternatives to control bee populations, all Village parks are pesticide free. The Village provides road-side refuse and recycling collection for all residences. Salt is stored at the Village's permitted salt storage facility until it is needed for de-icing of road, at which time it is mixed with sand and spread on an as-needed basis. The Village repaved sections of roads and repaired catch basins as needed to address flooding issues.

C. How many times was this observation measured or evaluated in this reporting period?

D. Has your MS4 made progress toward this measurable goal during this reporting period?

☒ Yes ☐ No

E. Is your MS4 on schedule to meet the deadline set forth in the SWMPP?

☒ Yes ☐ No

F. Briefly summarize the stormwater activities planned to meet the goals of this MCM during the next reporting cycle (including an implementation schedule).

The Village will continue monitoring municipal operations for stormwater pollution prevention opportunities. The Village will continue annual inspections, removal of materials from structures, use of natural alternatives to control bee populations, and prohibit the use of fertilizers and pesticides on public property. As a long term goal, the Village will evaluate the feasibility of constructing a new building for the storage and washing of maintenance vehicles and equipment. The Village plans to replace approximately 620 feet of drainage pipe along Mill Road with perforated plastic material.
